

## Partner With Us for an Impact Evaluation of Read Naturally Live

### What is Read Naturally Live?

Read Naturally Live is a web-based program. This program is used with students who need Tier 2 or Tier 3 intervention in reading. Read Naturally Live combines three powerful, evidence-based reading intervention strategies to individualize instruction and improve reading proficiency:

**Teacher Modeling:** Students read along while listening to a carefully-paced recording of a fluent reader.

**Repeated Reading:** The student reads a high-interest, nonfiction story until able to read it accurately and with expression.

**Progress Monitoring:** The student monitors reading progress through graphs showing fluency and comprehension performance.

### What is this project?

Read Naturally is partnering with school districts to evaluate the impact of Read Naturally Live.

Partner districts will have the opportunity to use the Read Naturally Live platform to individualize reading intervention for students in their elementary schools.

Read Naturally will collect data and analyze the impact of the intervention.

### What are the benefits of participation?

Participating districts will benefit from:

- Free access to the Read Live learning platform
- Up to six hours of free training for teachers
- Two facilitated data analysis team meetings
